DIV. OF HAZARDOUS MATERIAL
AND WASTE MANAGEMENT

Jack Wilson
Acting Commissioner
Bureau of Environmental Protection
D. N. R. E. P.
5th Floor Capital Plaza Tower
Frankfort, Ky. 40601

Dear Mr. Wilson,

Following up on our conversation this morning about the Valley of the Drums, my company, U. S. Traffic Coordinators is able to handle any and all the problems of transportation in moving these chemicals to a safe dumping ground. We are national in range with all the necessary authorities for interstate as well as intrastate hauling.

Our capabilities encompass barge traffic and this inturn increases the range of disposal of so vast an amount of waste in an economical fashion.

The best aspect of what we can do comes through our ability to act immediately. The pressures of public opinion could make this a practical necessity.

Thank you for the time you took to call in answer to my inquiry.

Sincerely,

Linda List
